**IV. DESCRIPTION OF HAZARDOUS WASTES**

**A. EPA HAZARDOUS WASTE NUMBER** — Enter the four-digit number from 40 CFR, Subpart D for each listed hazardous waste you will handle. If you handle hazardous wastes which are not listed in 40 CFR, Subpart D, enter the four-digit number(s) from 40 CFR, Subpart C that describes the characteristics and/or the toxic contaminants of those hazardous wastes.

**B. ESTIMATED ANNUAL QUANTITY** — For each listed waste entered in column A estimate the quantity of that waste that will be handled on an annual basis. For each characteristic or toxic contaminant entered in column A estimate the total annual quantity of all the non-listed waste(s) that will be handled which possess that characteristic or contaminant.

**C. UNIT OF MEASURE** — For each quantity entered in column B enter the unit of measure code. Units of measure which must be used and the appropriate codes are:

ENGLISH UNIT OF MEASURE                      CODE  
POUNDS..... P  
TONS..... T

METRIC UNIT OF MEASURE                      CODE  
KILOGRAMS..... K  
METRIC TONS..... M

If facility records use any other unit of measure for quantity, the units of measure must be converted into one of the required units of measure taking into account the appropriate density or specific gravity of the waste.

**D. PROCESSES****1. PROCESS CODES:**

**For listed hazardous waste:** For each listed hazardous waste entered in column A select the code(s) from the list of process codes contained in Item III to indicate how the waste will be stored, treated, and/or disposed of at the facility.

**For non-listed hazardous wastes:** For each characteristic or toxic contaminant entered in column A, select the code(s) from the list of process codes contained in Item III to indicate all the processes that will be used to store, treat, and/or dispose of all the non-listed hazardous wastes that possess that characteristic or toxic contaminant.

**Note:** Four spaces are provided for entering process codes. If more are needed: (1) Enter the first three as described; Enter "000" in the extreme right box of Item IV-D(1); and (3) Enter in the space provided on page 4, the line number and the additional code.

**2. PROCESS DESCRIPTION:** If a code is not listed for a process that will be used, describe the process in the space provided on the form.

**NOTE: HAZARDOUS WASTES DESCRIBED BY MORE THAN ONE EPA HAZARDOUS WASTE NUMBER** — Hazardous wastes that can be described by more than one EPA Hazardous Waste Number shall be described on the form as follows:

1. Select one of the EPA Hazardous Waste Numbers and enter it in column A. On the same line complete columns B, C, and D by estimating the total annual quantity of the waste and describing all the processes to be used to treat, store, and/or dispose of the waste.
2. In column A of the next line enter the other EPA Hazardous Waste Number that can be used to describe the waste. In column D(2) on that line enter "included with above" and make no other entries on that line.
3. Repeat step 2 for each other EPA Hazardous Waste Number that can be used to describe the hazardous waste.

**EXAMPLE FOR COMPLETING ITEM IV (shown in line numbers X-1, X-2, X-3, and X-4 below)** — A facility will treat and dispose of an estimated 900 pounds per year of chrome shavings from leather tanning and finishing operation. In addition, the facility will treat and dispose of three non-listed wastes. Two wastes are corrosive only and there will be an estimated 200 pounds per year of each waste. The other waste is corrosive and ignitable and there will be an estimated 100 pounds per year of that waste. Treatment will be in an incinerator and disposal will be in a landfill.

#### NOTES TO DRAWING

1. Building 312: DRMO hazardous materials storage area. If materials cannot be reutilized through transfer, donation, or sale, they are disposed of through contract as wastes.
2. Used Solvent Underground Tanks: Two 1000 gallon tanks formerly used to collect used solvent which was considered ignitable due to its flashpoint. Due to a change in solvent type, the wastes now generated are not considered hazardous. Tanks still in use.
3. Methyl Bromide Burial Site: Burial of approximately 13,000 16-oz. aerosol cans in 1971 in a plastic-lined landfill. Area has been identified as a CERCLA site and is being assessed.
4. Underground Tank: 1000 gallon tank formerly used to collect waste paints, solvents, and/or petroleum. Area has been identified as a CERCLA site and is being assessed.
5. Future Hazardous Waste Storage Site: Location of future conforming storage facility for DCSC/DRMO hazardous materials and wastes. Plans for the facility will be submitted with the Part B application during 1988.

Dear Commander Dreska:

Thank you for your prompt response to our January 8, 1988, request for additional items supporting your application for changes in your Part A permit. We have reviewed your response and have found one remaining deficiency in the application. The topographic map submitted in response to our previous request does not extend one mile beyond the property, facility or activity. All other deficiencies noted previously have been responded to adequately.

If you have any questions, please contact Andy Kubalak of our Central District Office at (614)644-2055.

Sincerely,

Edward A. Kitchen, Manager  
Technical Assistance and Engineering Section  
Division of Solid and Hazardous Waste Management
